LATEST UPDATES

By Ian Parkin

We've been listening hard and adding new features you have requested into SchooliP, below are just a few of the recent changes.

New Export Review Option - Allows a review to be exported, including any evidence, downloaded into one simple zip file. No more downloading individual items when you want to archive one or more reviews.

CPD Reports now include Provider - The CPD reports now include the provider for the course both on-screen and in the export.

Review Period Grading Report includes Department - The report now includes staff members departments so the report can be filtered, and exported, by department.

Hide Interim Reviews right - We know all customers don't use Interim Reviews for all staff so these can now be turned on/off based on a staff members user rights.

SDP more configurable - New settings have been added to allow individual tabs to be turned on/off as required.
